Experience integrated intelligence
from Intuitive

Integrated intelligence

Actionable digital insights across the care continuum

Intuitive's digitally connected ecosystem provides enhanced capabilities, intraoperative guidance, decision support, and personalized learning, with the goal to help improve outcomes and efficiency.

My Intuitive and Intuitive Hub connect systems, learning, and services to help you streamline, collaborate, and optimize procedures throughout your facility.

Intuitive Hub

- Media management
- Audio/video bookmarking
- Telepresence (host)
- Procedure review
- EMR integration (optional)
- Enterprise use (platform agnostic)

Audio, video, system events

My Intuitive app and web

My Intuitive app and My Intuitive for the web are compatible with da Vinci systems

- Case reports
- Telepresence (observe)
- 3D modeling
- Auto-bookmarked video library
- Intuitive learning
- Trusted contacts
- Customer portal
- SimNow

Powered by digital to help reduce variability and optimize workflow

Da Vinci systems were built for digital.

When you add Intuitive Hub, you enable an automatic, seamless digital transition that delivers robotic procedure video capture nearly immediately to your team. Together with My Intuitive, our digital solutions can help you:

- Make informed decisions about investments in your operating rooms
- Track system utilization and reduce inventory costs
- Expedite procedure reviews and provide insights to techniques for clinicians and staff
- Drive instrumentation consistency
- Facilitate increased robotics training for efficiencies that may address staffing shortages

Driving efficiency through education and communication

Dr. Megan Jenkins
NYU Health, 05/2022

“ The Hub is a **great tool for teaching and learning, and I believe it will revamp our robotic education program.** For example, yesterday I proctored a case and immediately after, we were able to access the video and watch the case together. The ability to do this so quickly after the case, really reinforced the lessons learned during the procedure.”

Enhancing patient experience

Dr. JJ Tabor, GS
Baton Rouge General IDN | Mayo Clinic Care Network, 05/2022

“ The Intuitive Hub has **transformed the way I interact and connect with my patients and their families.** Many patients have asked for video clips and/or images of their surgeries. The Intuitive Hub allows me to send that digital content to my patients immediately and easily. That same digital content helps reassure family members after the case as I walk them through the procedure.”

Strengthening referral relationships

Dr. JJ Tabor, GS
Baton Rouge General IDN | Mayo Clinic Care Network, 05/2022

“ The Intuitive Hub allows me to send snippets of my cases to my referring physicians. In the past, I would only send notes to my gastroenterologists. Now I am able to send pre and post operative patient images easily. Those **videos help strengthen my relationships with my referring physicians and enhance our collaboration.** In a short period of time, I have already seen my referrals increase.”

Streamlining collaboration

Stephen Mumford, COO
Baton Rouge General IDN | Mayo Clinic Care Network, 05/2022

“ The Intuitive Hub has **streamlined the connection between surgeons and staff (i.e. surgeons, nurses, specialists, etc.).** Hub allows surgeons at BRG the ability to quickly capture and send a video clip or image to another surgeon for additional surgeon or specialist consult. This benefit has never been easier.

Enabling staff to **collaborate more effectively** can help improve job satisfaction and ultimately may **improve the quality of care** we can provide at BRG.”

Built for the enterprise

Record from any video source

Intuitive Hub can connect to and record from any DICOM-compatible device in procedure suites across the hospital.

Integration with medical records

If enabled, Intuitive Hub can use an encrypted connection to hospital information systems to build a worklist for the day or share video and images directly to the patient's electronic file.

Cloud-based* or on-premise options

Choose the architecture that is right for your hospital, whether contained within its own network or via a safe and secure connection to the cloud.

New capabilities added over time

Intuitive Hub can further enhance your experience with da Vinci® systems through software updates.

*Availability of cloud storage will vary by country, depending on completion of work in progress and any required regulatory activities. Check with your local Intuitive team for availability in that market.

Enable collaboration and video capture with Intuitive Hub

Intuitive Hub is a monitor that connects to your da Vinci® system (or other DICOM-compatible devices) to enable video recording. When paired with da Vinci systems, additional capabilities are enabled:

- Automated capture, bookmarking, and editing
- Easily bookmark, edit, and share video clips
- Secure electronic medical record (EMR) integration (optional)
- Enable virtual collaboration on site and outside the hospital

“ The Intuitive Hub’s enablement of sharing surgical video and images and the potential of remote case observation has been a **catalyst in building the brand of Baton Rouge General Hospital** within our community and more broadly throughout the region.

Stephen Mumford, COO

Baton Rouge General
IDN | Mayo Clinic
Care Network, 05/2022

“ I had a partner reach out to me, intra-operatively, with a question. With the Intuitive Hub, I was able to **remotely beam into the operating room and collaborate from my office.** Not only was I able to help but it allowed me to continue with my scheduled clinic for the day, and not cancel or delay my patients.”

Dr. Trey Robertson, GS

Franklin Woods
Community Hospital
IDN | Ballad Health, 05/2022

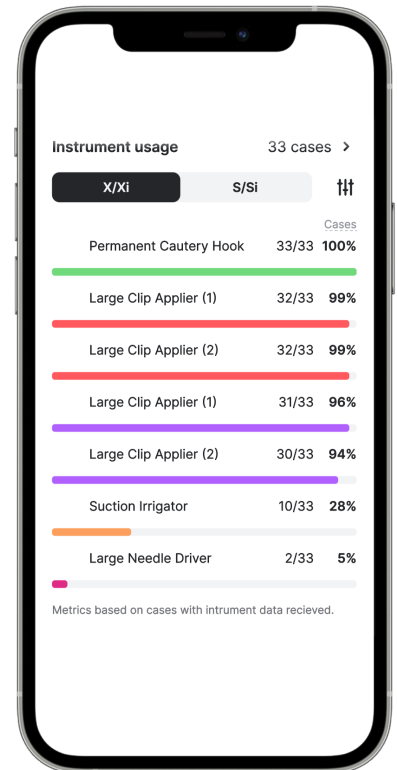

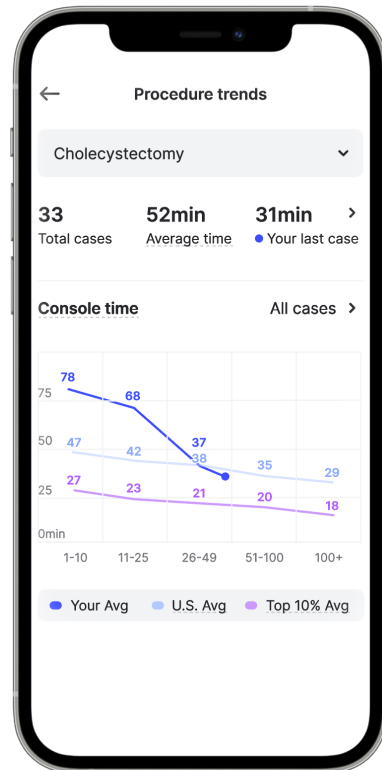

Access data insights with My Intuitive

“ The My Intuitive app, has been a reliable tool...and also allows me to **track my volume** of procedures with the da Vinci system. I have been able to show how I have **improved my efficiency for cholecystectomy.**”

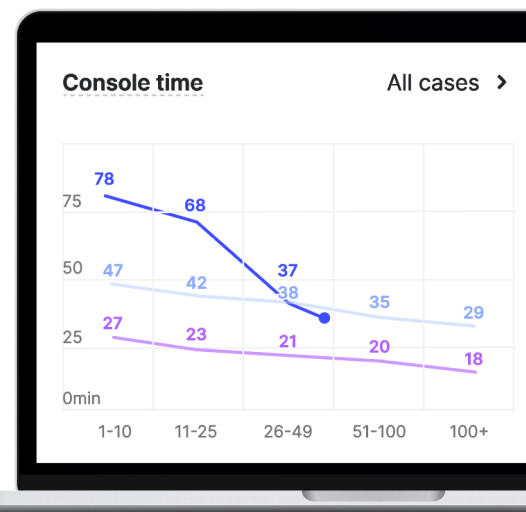

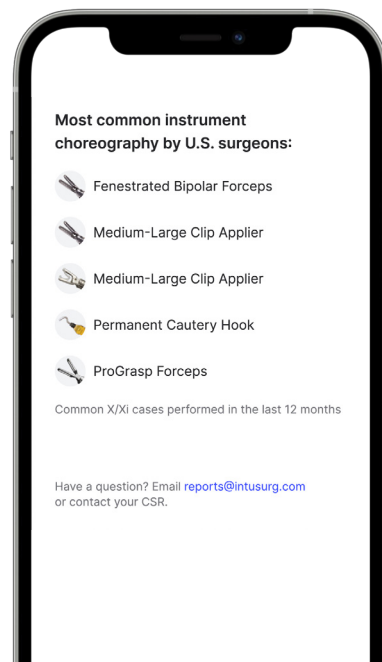

Peter Ching
Austin, Texas

With My Intuitive, clinicians can access their case data to provide real-time, actionable insights to customers with the vision of helping them improve performance, reduce variability, and improve outcomes over time. My Intuitive allows easy, secure access to system data from anywhere, providing insights such as total procedure count, console time, and instrument utilization.

From a mobile device, My Intuitive users can stay connected and receive the latest data insights from their use of the da Vinci® system.

From a desktop, users can access my.intuitive.com for expanded data insights, virtual collaboration, and learning.

Maximize the value of da Vinci systems for your patients and your program

Our mission statement

We believe that minimally invasive care is life-enhancing care. Through ingenuity and intelligent technology, we expand the potential of physicians to heal without constraints.

Quantified performance

Experience meets performance

Nearly three decades, and more than 10 million procedures performed globally through 2021 using the da Vinci® surgical system and in collaboration with surgeons, care teams, and hospitals with the goal to help consistently deliver better, more predictable outcomes.

Unified ecosystem to enable MIS

Spectrum of procedures and programs

Innovation for today and the future with four generations of da Vinci® surgical systems, learning, and services, all united in one ecosystem to help surgeons, care teams, and hospitals achieve robotics total practice* and program excellence.

Integrated intelligence

Actionable digital insights across the care continuum

Digitally connected ecosystem providing enhanced capabilities, intraoperative guidance, decision support, and personalized learning, with the goal to help improve outcomes and efficiency.

*Total da Vinci Practice refers to the transferable value of robotic-assisted surgery with a da Vinci system across procedures in a surgeon's minimally invasive practice. It is at the surgeon's discretion to determine when a patient is a candidate for minimally invasive surgery and whether robotic-assisted surgery with a da Vinci system is an option.

Financial disclosure

Peter Ching, Stephen Mumford, Drs. Jenkins, Robertson, and Tabor have received compensation from Intuitive for consulting and/or educational services.

Healthcare professional disclosure

The material presented represents the views, experiences, and opinions of independent healthcare professionals based on their experiences with the da Vinci surgical system. Their experience may or may not be reproducible and is not generalizable.

Important safety information

For important safety information, please refer to www.intuitive.com/safety. For a product's intended use and/or indications for use, risks, full cautions and warnings, please refer to the associated User Manual(s).

Da Vinci Xi/X system precaution statement

The demonstration of safety and effectiveness for the representative specific procedures did not include evaluation of outcomes related to the treatment of cancer (overall survival, disease-free survival, local recurrence) or unless otherwise noted, all people depicted are models.

Limitations of training

Nothing in Intuitive's training curricula makes expressed or implied promises or commitments to the persons attending. This includes any promise or commitment that the trainee will be provided any specific product or technology in future or that the trainee will be certified to perform a procedure related to the curriculum. Some of the training described in Intuitive promotions may be provided by organizations or entities other than Intuitive.

Training provided by Intuitive is limited to the use of the da Vinci surgical system and does not replace the necessary medical training and experience required to perform surgery. The da Vinci surgical system should be used only by surgeons who have received specific training in its use. Before performing any procedure using a da Vinci system, physicians are responsible for receiving sufficient training and proctoring to ensure that they have the skill and experience necessary to protect the health and safety of their patients.
